

LITHIUM REEL BATTERY

Product Safety & Usage Disclaimer

1. Operational & Transit Requirements

1.1 This lithium battery is designed exclusively for fishing reels and must be operated according to the supplied manual. **1.2** Users must only use the supplied charger connected to a 240V mains power source; do not charge via inverters. **1.3** Note that the battery-to-lead connection uses a reverse-wind thread (turn the opposite way). **1.4** To prevent damage, the battery must be transported in its original box and secured so it cannot move. **1.5** DO NOT leave the battery on the boat gunnel, in a rod holder while running back up the drift, or in a rod holder mounted on the rocket launcher. These locations expose the battery to water and salt spray, which causes terminal corrosion and catastrophic electrical short-circuits. **1.6** DO NOT leave the battery inside a car because the extreme heat will trigger internal swelling and chemical leakage. This heat damage is irreversible and will permanently destroy the battery's ability to function. **1.7** Cables must remain disconnected whenever the battery is not in active use.

2. Maintenance, Storage & Pro-Rata Warranty

2.1 To avoid hazards, the battery must be stored in a cool environment away from direct sunlight with a charge level above 50%. **2.2** If the battery enters Low Voltage Disconnect/Over-Discharge Protection (less than 10V/20V/30V/40V depending on model), it must be charged within two weeks to avoid permanent damage. **2.3** The unit must be recharged every six months if unused, and terminals must be lubricated regularly. **2.4** This product is covered by a Pro-Rata Warranty, meaning the warranty credit is calculated based on the remaining months of the term and the time the battery has been in service. **2.5 WARRANTY ACTIVATION:** To be valid, this physical disclaimer must be signed, dated, and kept with your original purchase receipt. The retailer must provide this document at the point of sale. **2.6** The warranty is non-transferable and rendered void if the product is resold or if these specific care instructions are neglected.

Acknowledgment of Risk and Terms

I have read the above Product Safety and Usage Disclaimer and understand that lithium batteries require specific handling to remain safe and functional. I acknowledge that I must adhere to all charging, storage, and maintenance protocols, and I understand that failure to follow these instructions, or the reselling of this unit, will void all warranty coverage.
